

# Data structure using C

1. Introduction data structure
2. Overview of C programming / prerequisite of DS
3. Data structures in C
  - a. Array in DS
  - b. Stack in DS
  - c. Queue in DS
  - d. Linked list in DS
4. Array
  - a. Basic of array
  - b. Insert operation
  - c. Search operation
  - d. Sorting(ascending and descending)
  - e. Delete operation
5. Stack
  - a. Stack basic
  - b. Push operation
  - c. Pop operation
  - d. Stack example
6. Queue
  - a. Queue basic
  - b. Enqueue operation
  - c. Dequeue operation
  - d. Queue example
7. Linked list
  - a. Linked basic
  - b. Types of linked list
    - i. Singly
    - ii. Doubly
    - iii. Circular
8. Searching technique
  - a. Linear search
  - b. Binary search
9. Sorting and searching
  - a. Sorting techniques
  - b. Bubble sort
  - c. Selection sort
  - d. Insertion sort
  - e. Quick sort
  - f. Merge sort
  - g. Heap sort
